1. Introduction

SafeStore is a comprehensive management system designed specifically for convenience stores and disposable goods stores. It allows you to manage inventory, sales, reservations, accounts receivable, and suppliers, and to generate reports.

Key Features:

- Comprehensive inventory management
- Sales system with invoicing
- Daily cash register reconciliation
- Customer credit management
- Reservation system
- Expiration alerts
- PDF reports
- Cloud synchronizatio
- User-friendly and intuitive interface

2. System requirements

Hardware:

- Processor: 1 GHz or higher
- RAM: 512 MB minimum (1 GB recommended)
- Disk space: 100 MB
- Screen resolution: 1024 x 768 or higher

Software:

- Operating System: Windows 7/8/10/11, Linux, or macOS
- Java Runtime Environment (JRE) 8 or higher
- Internet connection (for MongoDB Atlas)

3. Installation

Quick Installation (Windows):

1. Download the SafeStore-v2.0.zip file
2. Extract the file to a folder
3. Run install.bat as an administrator
4. Follow the on-screen instructions
5. A shortcut will be created on the desktop

Run as a Portable Application (No Installation Required):

1. Extract the file
2. Run run.bat (Windows) or run.sh (Linux/Mac)
3. The application will run without needing to be installed

Uninstallation (Windows):

1. Go to the installation folder
2. Run uninstall.bat as an administrator
3. Confirm the uninstallation

4. Login

Login Screen:

1. Enter your **username**
2. Enter your **password**
3. Select your **role** (Manager or Cashier)
4. Click **Login**

Default Credentials:

User	Password	Role
admin	admin	Manager
manager	1234	Manager
cashier 1	1234	Cashier
cashier	cashier	Cashier

New User Registration:

1. Click Register
2. Fill in the fields:
 - Username
 - Email
 - Password
 - Confirm Password
 - Role
3. Click Register

Password Recovery:

1. Click Forgot my password
2. Enter your username or email address
3. You will receive a recovery code
4. Enter the code and your new password
5. Click Reset Password

Generate PDF reports on slow-moving products.

Generate Report:

1. Click **Analyze Products** to analyze
2. Click **Generate Report** to create the report
3. Click **Export to PDF** to save

Interpreting Results:

- **SLOW MOVING:** Turnover rate < 0.5
- **Normal:** Turnover rate between 0.5 and 1.5
- **Fast Moving:** Turnover rate > 1.5

6.11 Cloud Synchronization

Synchronize data with MongoDB Atlas.

Functions:

- **Connect:** Connect to the cloud
- **Disconnect:** Disconnect
- **Upload to Cloud:** Upload data
- **Download from Cloud:** Download data

6.12 Backups

Create and manage database backups.

Functions:

- **Create:** Create a new backup
- **Restore:** Restore a backup
- **Delete:** Delete a backup
- **Upload to Cloud:** Upload to the cloud
- **Download from Cloud:** Download from the cloud
- **View Backups:** View the list of backups

6.13 Adaptive Interface

Customize the app's appearance.

Customization Options:

- **Theme:** Light, Dark, System Default
- **Font Size:** Small, Medium, Large, Extra Large
- **Language:** English, Spanish, Portuguese
- **High Contrast:** On/Off
- **Animations:** On/Off

7. User Management

System Roles:

Role	Permissions
Manager	Full access to all modules
Cashier	Sales and Cashier Only

Change Password:

1. Log in as a user
2. Use the authentication module
3. Enter your current and new passwords
4. Confirm the change

8. Troubleshooting**Error: “Unable to connect to the database”**

- Check your Internet connection
- Make sure MongoDB Atlas is active
- Check the credentials in the code

Error: “Incorrect username or password”

- Verify that you are using the correct credentials
- Make sure the selected role matches
- If you forgot your password, use “Forgot Password”

Error: “Could not generate the PDF”

- Check that you have write permissions
- Make sure the reports directory exists
- Check that you have disk space

The application is not running

- Check that Java is installed
- Run `java -version` in the terminal
- Download and install Java if necessary
